

TRANSPARENCY STATEMENT

Update of environmental communications in relation to Directive (EU) 2024/825

Menz&Gasser is updating its communication materials in line with the principles introduced by Directive (EU) 2024/825, with particular reference to the transparency of environmental communications addressed to consumers.

This initiative also includes the review of the “Il Nostro Cuore Verde” (“We are green at heart”) symbol, featured on selected packaging and display materials, with regard to the proper communication of disposal and waste-sorting guidelines.

The symbol was created solely for informational purposes, to draw attention to the importance of separate waste collection and correct disposal.

“Il Nostro Cuore Verde” (“We are green at heart”) is not intended to represent an environmental certification or a seal of approval by third parties, nor is it intended to attribute to products or packaging any environmental characteristics or benefits beyond the information provided.

Menz&Gasser SpA aims to make its communication increasingly clear and immediate. For this reason, the Company has initiated a process to progressively remove from and/or replace the symbol in relevant materials and media.

During this transition phase, this statement is being published to clarify the original meaning of the symbol and the context in which it was used.

Information on packaging materials and correct disposal methods is available on the recycling page (menz-gasser.it/en/recycling) For correct disposal, it is also necessary to refer to the provisions laid down by the relevant local authority.

Transparency, clarity and accuracy of communication are an ongoing commitment. Menz&Gasser will continue to monitor and update its content so that information addressed to consumers remains clear, reliable and consistent with these principles.

This statement is published for transparency and information purposes for consumers.

Menz&Gasser S.p.A.
